

Precious Oil Extract

LYC moisturizers work with your skin to keep it soft, supple and youthful-looking. Moisturizers are needed both night and day to help maintain the skin's proper moisture balance. One cannot over-moisturize your skin.

Precious Oil Extract is a luxurious, intensive treatment oil designed to penetrate deeply into skin tissues, helping to soothe away fine lines and wrinkles. It is, surprisingly, a very light-weight oil with a very subtle fragrance. It is excellent for those with very dehydrated skin. Produced with emulan oil; there is no oil like it on the market. Excellent for the eye area, laugh lines and all other dehydrated areas. Many customers enjoy using it on dry elbows, knees and around the cuticles of the fingernails to keep from getting hang-nails. It may also be used on other dry areas of the body. Apply gently using patting motion both night and morning.
