

Ultimate “C” Cream

Vitamin C is nature’s defense against free radicals that aggressively attack the skin’s tissues and cause premature aging and wrinkling. Amazingly, Vitamin C is also a natural sun protectant! Ultimate “C” Cream contains several highly sophisticated derivatives of Vitamin C that replenishes skin tissues depleted of Vitamin C. The results are a healthy, vibrant skin that is able to repair damaged conditions when they occur as well as a complexion that can combat the rigors of the sun and elements.

According to Dr. Julian Whitaker, M.D. in his newsletter supplement to *Health and Healing*, not only do all of our biological systems depend on antioxidants for protection against free radical damage, but so does our skin (the largest organ of our body). He says that it is also important to apply antioxidants topically.

The problem with topical antioxidants is that they are notoriously unstable. Fortunately for our customers, we have a wonderfully light, but effective Ultimate "C" Cream that enables you to apply Vitamin C, an excellent antioxidant we are all familiar with, right on the skin. Our Ultimate "C" Cream is one of our customers' favorite moisturizers and is enjoyed by both men and women for this reason. Apply a small amount daily, both morning and night, over entire face and throat areas in upward motions.
